EXECUTIVE SUMMARY

Lead Platform & Systems Integration Engineer with 7+ years of experience designing resilient cloud-native infrastructure, multi-agent AI orchestration workflows, and mission-critical enterprise systems. Proven track record in orchestrating multi-node distributed Kubernetes (K3s) clusters over Tailscale mesh networks, engineering high-precision document OCR & LLM extraction pipelines (>85% manual entry time reduction), architecting in-cluster autonomous CI/CD runner fleets, and delivering high-throughput middleware connecting Tier-1 ERPs (Oracle NetSuite, Odoo), collaborative workspaces (Lark Base), and government-certified digital signing engines across 50+ microservices.

TECHNICAL COMPETENCIES

 Cloud & Kubernetes Orchestration Kubernetes (K3s v1.36), Docker, Tailscale Mesh VPN, Cloudflare (Edge & Workers), Nginx Load Balancing, VictoriaLogs, Vector, In-Cluster Runner Fleets	 Multi-Agent AI & Platform DevEx Multi-Agent Orchestration (pm-orchestrator), Model Context Protocol (MCP), Document OCR / Vision LLM, Ollama Local Clusters, LiteLLM AI Gateway, persistent tmux Dev Hooks
 Enterprise Systems Integration Oracle NetSuite ERP, Odoo ERP (MES / Inventory), Lark Suite OpenAPI & Base, Mekari Sign (PERURI E-Meterai), WhatsApp Business API, Idempotent Transaction Queues	 Backend, Databases & Full-Stack TypeScript, Python, Node.js, PHP / Laravel, Go, Next.js (App Router), React, Tailwind CSS, PostgreSQL, MySQL, Redis, MinIO S3 Object Storage, SQLite, Prisma ORM

PROFESSIONAL EXPERIENCE

Lead Platform & Systems Integration Engineer — PT. Bina Dana Sejahtera / Pras Setia Dwidharma	August 2019 – Present (5+ Years)
Distributed K3s Cluster Orchestration: Architected and maintain a production 3-node distributed Kubernetes (K3s v1.36) cluster spanning cloud VPS nodes linked over an encrypted Tailscale Mesh VPN, handling 50+ enterprise services with zero public port exposure. Autonomous In-Cluster CI/CD: Built an in-cluster GitHub Actions self-hosted runner fleet and private container registry in namespace build-system, eliminating hosted runner quota bottlenecks and accelerating Docker image build times by 4x. Intelligent Document & PO Extraction Pipeline: Engineered an end-to-end OCR and Vision LLM pipeline extracting complex multi-format supplier quotes and Purchase Orders (POs) into validated JSON data directly synced into Lark Base & ERPs, reducing manual data entry time by over 85%. Oracle NetSuite ERP Middleware: Built high-reliability financial integration middleware (NetSpark) connecting banking feeds, retail POS, and billing events to NetSuite General Ledger with transactional idempotency, automated DLQ retry queues, and 0% financial data loss. Manufacturing Execution System (MES) & Odoo Integration: Architected a custom shopfloor MES for a commercial seafood processing enterprise, bridging barcode weighing scales and lot traceability directly with on-premise Odoo ERP. Digital Legal Signing Automation (VirtueSign): Developed an automated middleware connecting Lark Base workflows with Mekari Sign & PERURI e-meterai APIs, slashing contract execution and stamp turnaround from 3 days to under 15 minutes. Multi-Agent AI Task Manager (pm-orchestrator): Created a background CLI orchestrator daemon managing resident coding agents (Claude, Codex, Antigravity) inside persistent tmux sessions across 50+ repositories with dynamic model routing and context enrichment. Enterprise Smart BMS Platform: Led full-stack development of an 8-module commercial Building Management System on Next.js 16 + PostgreSQL 18 managing tenant leasing, utility tariff calculations, and maintenance ticketing. Core Insurance & Brokerage Systems (SIAP): Spearheaded development and maintenance of enterprise insurance broker platforms (DigiSIAP, IIBS, SIAP), handling insurance submissions, claim disbursements, and legacy custom PHP bridge migration to Laravel 13.	
Backend Developer — PT. PFI Megalife Insurance	February 2019 – May 2019
- Developed backend subsystems for high-volume automated SMS notification dispatch and creditshield policy reporting. - Engineered secure API endpoints for policyholder validation, payment gateway callbacks, and claim status checks.	

KEY ENGINEERED PLATFORMS & PRODUCTION CASE STUDIES

Intelligent Procurement & Purchase Order (PO) Parsing Pipeline Automated document intelligence pipeline transforming unstructured supplier quotes and multi-page POs into validated JSON tables with SKU reconciliation and direct sync to Lark Base & ERPs. Tech: Python, FastAPI, Vision LLM, MinIO S3, Lark Base OpenAPI, Docker • Impact: >85% time reduction (40 mins → <15s)	AI & Document Intelligence
Food Processing Manufacturing Execution System (MES) Shopfloor touch terminal MES capturing barcode weights, production batch yields, and operator shifts, streaming validated production orders straight into on-premise Odoo ERP. Tech: Next.js, Node.js, Odoo ERP XML-RPC/REST, PostgreSQL, Docker • Impact: 100% real-time batch traceability & yield tracking	Industrial IoT & ERP
Commercial High-Rise Smart Building Management System (BMS) All-in-one 8-module high-rise facility platform orchestrating tenant leasing, tiered power/water utility billing calculations, preventive maintenance work orders, and QR visitor turnstiles. Tech: Next.js 16, PostgreSQL 18, Tailwind CSS, shadcn/ui, Docker, K3s • Impact: Consolidated 5 legacy systems into 1 portal	Full-Stack Platform
High-Precision Warehouse & Asset Management System (WMS/AMS) Enterprise WMS/AMS for a tier-1 commercial fitness equipment distributor (Technogym partner), managing serialized parts hierarchy, digital PDI checklists, and warranty engineer dispatch. Tech: TypeScript, Next.js, PostgreSQL, Prisma ORM, K3s • Impact: 99.8% inventory accuracy across central warehouse & showrooms	Supply Chain Logistics
Automated Financial Auditing & Receipt Intelligence (Kwix) Computer vision and multimodal LLM service parsing crumpled thermal receipts and invoices into normalized accounting line items with automated duplicate claim and VAT anomaly detection. Tech: Python, OpenCV, Vision LLM, FastAPI, Redis • Impact: Sub-second extraction with zero manual expense audit backlog	FinTech Computer Vision
Oracle NetSuite ERP Financial Integration Middleware (NetSpark) High-reliability financial integration bridge streaming transactional banking feeds, billing events, and retail POS to NetSuite General Ledger with idempotency and zero data loss. Tech: TypeScript, Node.js, NetSuite SuiteTalk API, Redis, PostgreSQL • Impact: 0% duplicate or lost entries, real-time reconciliation	Enterprise Middleware
Digital Signature & PERURI E-Meterai Automation (VirtueSign) Middleware integrating Lark Base collaborative databases with official digital signature providers (Mekari Sign & PERURI e-meterai) for automated legal stamping and contract dispatch. Tech: Node.js, TypeScript, Mekari Sign API, Lark Base OpenAPI, Gotenberg • Impact: Slashing signing turnaround from 3 days to 15 mins	LegalTech Automation
Autonomous Multi-Agent AI Task Manager (pm-orchestrator) Persistent VPS background orchestrator coordinating multiple LLM agents (Claude Code, OpenAI Codex, Google Antigravity) inside dedicated tmux sessions across 50+ repositories. Tech: Python, tmux, SQLite, Model Context Protocol (MCP), Bash • Impact: Managing 50+ repos with zero context switching	AI Platform & DevEx
Edge AI Facial Recognition Attendance Kiosk On-premise edge computer vision kiosk for retail staff attendance with anti-spoofing liveness verification, syncing timestamps in real time directly to Smart Salary payroll databases. Tech: Python, OpenCV, FaceNet/InsightFace, SQLite, REST APIs • Impact: Sub-500ms verification, eliminated buddy-punching completely	Computer Vision & IoT
Regional Unified Commerce & B2B Supply Chain (Flotim Niaga) Multi-tier commerce engine connecting regional MSMEs (UMKM), hotel hospitality chains, and food producers in Eastern Indonesia (Flores Timur) with localized shipping and automated QRIS. Tech: Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS • Impact: Digitised supply chain across dozens of regional producers	E-Commerce Engine

FORMAL EDUCATION

Bachelor of Informatics Engineering (S.Kom) — Universitas Bhayangkara Jakarta Raya	2015 – 2020
Vocational Diploma in Software Engineering (RPL) — SMK Mandalahayu Bekasi	2012 – 2015

CERTIFICATIONS OF COMPETENCE

Certified Web Developer (BNSP / LSP TIK GLOBAL) — Software Programming & Development	Issued April 2023
---	-------------------
